Simplilearn vs Edureka — Market Intelligence Report

Authors: Head Manager (coordinator) + Research Team
Date: 2026-09-04 (data pulls: see Appendix)
Version: final_report_v1.md (export: final_report_v1.pdf)

Executive summary (TL;DR — 5 bullets + 3 supporting numbers)

- Market headline: The global professional online certification and upskilling market is sizable and still growing rapidly as enterprises shift L&D spend to digital vendors and micro-credentials. (Estimate to validate: see Appendix D for sources and method.)
- Comparative positioning: Simplilearn is best-positioned for enterprise and high-ticket certification programs (broader catalog + enterprise features). Edureka is stronger on high-touch, instructor-led cohort experiences targeted at individual career-switchers and SMEs. Validate with Task 1 course/catalog and enterprise client lists.
- Top 3 strategic recommendations:
 1. Engage Simplilearn for an enterprise pilot (50 seats, focused category) to test outcomes-based seat pricing and integration capabilities. — Owner: BD Lead.
 2. Run pricing and packaging experiments (cohort premium vs subscription) for each brand to measure price elasticity and LTV impact. — Owner: Product Pricing Lead.
 3. Launch 90-day growth pilots: paid search for high-intent keywords + ABM pilot targeting 10 enterprise accounts; optimize by week 4. — Owner: Growth Lead.
- Immediate next steps and owners:
 - Ops: Grant web-scrape/search access or upload Task 1 artifacts so the team can populate the figures. (See exact Ops string in Delegations.)
 - Research & Data teams: Deliver scrapes/CSVs and extraction_log to /project_root/raw_data/ within 48 hours after access is granted.

- Analyst: Populate TAM/SAM/SOM and finalize numeric report updates. Deliverable: final_report_v1.md populated and QAed.
- Risk & mitigation summary: Key data gaps (traffic, exact pricing, funding/revenue) will drive uncertainty — mitigate by triaging required assets (scrapes, SimilarWeb/SEM exports, industry PDFs) and running sensitivity ranges in Appendix C.

Supporting numbers (placeholders/estimates — replace with Task 1 data):

- Estimated catalog breadth (example estimate): Simplilearn ~2,000–3,500 courses; Edureka ~500–1,200 courses. (Replace with exact counts from course catalog CSVs.)
- Example traffic proxy (monthly visits, sample estimate to be validated): Simplilearn 5M–12M; Edureka 1M–4M. (Replace with SimilarWeb/Semrush exports.)
- Example enterprise/funding signal: Simplilearn funding/valuation signals larger enterprise footprint vs Edureka historically smaller rounds — verify Crunchbase/PitchBook rows.

(Executive summary written to be one page; all numbers and claims below must be cross-validated and sourced in Appendix D.)

Contents

1. Methodology & data sources
2. Market size & growth (triangulation)
3. Competitor landscape & profiles (Simplilearn, Edureka)
4. Comparative analysis (side-by-side metrics)
5. Pricing models & examples

6. Industry trends & developments
 7. Business analysis & strategic recommendations
 8. GTM strategy (ICPs, positioning, messaging, channels, pricing experiments)
 9. Implementation roadmap (30–60–90)
 10. Measurement, KPIs & dashboards
 11. Appendices: data appendix, scraping logs, calculations, sources, glossary, reproducibility
-

1. Methodology & data sources

- Timeframe: market trends 2019–2024 (extend to 2026 if new reports available); pricing last 12 months.
- Primary methods:
 - Web scrapes (pricing pages, course catalogs, course detail pages) → save raw HTML to `/project_root/scrapes/`, extracted CSVs to `/project_root/raw_data/`.
 - Traffic & engagement: SimilarWeb / Semrush / Ahrefs exports.
 - Funding & company signals: Crunchbase / PitchBook / LinkedIn.
 - Reviews & sentiment: Trustpilot / G2 / Google Play / App Store, Glassdoor for employer sentiment.
 - Industry sizing: HolonIQ, MarketsandMarkets, Statista, Allied Market Research (triangulate).
- Data provenance rules:
 - Every data point must include `source_url` and `capture_timestamp`. Currency amounts normalized to USD (FX source: OANDA; record `fx_rate_timestamp`).
 - Conflict resolution: prefer most recent primary source; if discrepancy persists, present range and justify

selection in Appendix C.

- Reproducibility: See Appendix E for reproducibility README and exact scrape selectors and scripts.

2. Market size & growth (approach and interim results)

Note: Live source values must be inserted by the Analyst from Task 1 artifacts. Below is the method and placeholder triangulation.

- Approach:
 1. Collect estimates from 3–5 industry reports (HolonIQ, MarketsandMarkets, Statista, Allied Market Research).
 2. Normalize to USD and record report year and methodology.
 3. Present low/median/high range and selected "consensus" median with caveats.
- Interim (placeholder) triangulation:
 - Low estimate: \$X billion (e.g., conservative report) — [source placeholder]
 - Median estimate: \$Y billion — [source placeholder]
 - High estimate: \$Z billion (aggressive projection) — [source placeholder]
- Methodology note: If industry reports diverge, median is presented and sensitivity range provided. For investor or procurement decisions present low/median/high with associated assumptions.
- Table to populate (Appendix D will list the actual source rows):
 - Source | Year | Estimate (USD) | Methodology notes | URL

Interpretation (example): Demand is being driven by corporate L&D budgets shifting to digital delivery, the rise of micro-credentials and employer-aligned programs, and increased hiring demand in cloud, data, and AI. Validate with cited report excerpts.

3. Competitor landscape

- Primary focus: Simplilearn and Edureka.
- Context players to include: Coursera (Enterprise), Udemy Business, upGrad, Pluralsight, LinkedIn Learning, local/regional bootcamps.
- High-level competitor table (to be filled from Task 1 data):
 - Company | Founded | HQ | Employees (LinkedIn) | Funding | Notable offerings | URL
 - Simplilearn | <<year>> | <<city>> | <<n>> | <<amount/rounds>> | Professional certificates, bootcamps, enterprise LMS | <https://www.simplilearn.com>
 - Edureka | <<year>> | <<city>> | <<n>> | <<amount/rounds>> | Live instructor-led courses, cohorts, bootcamps | <https://www.edureka.co>

Interpretation summary (provisional):

- Simplilearn: Focus on enterprise, certification alignment, broad catalog, partnerships with hiring employers/universities. Strong enterprise sales and productized seat-based offerings are typical strengths.
- Edureka: Focus on live cohorts, instructor-led training, higher touch for individual learners and SMEs. Strengths include cohort engagement and project-based outcomes.

(Full, sourced company profiles and competitor matrix to be populated with Task 1/2 inputs.)

4. Simplilearn profile (to be validated with Task 1 scrapes)

- Overview:
 - Founded: <<year>> (source: company about page)
 - HQ: <<city, country>>
 - Employee count (LinkedIn): <<count>> (capture date)
- Product portfolio & catalog:
 - Total courses: <<count>> (from course catalog CSV)
 - Key categories: Data Science, Cloud, DevOps, Cybersecurity, Digital Marketing, Project Management (counts)
 - Modalities: live instructor-led, self-paced, bootcamps — distribution to be filled
- Pricing & packaging:
 - Typical per-course price range (USD): min A — *median* B — max \$C (currency-normalized)
 - Enterprise offerings: seat-based licensing, enterprise admin dashboards, custom cohorts (details/screenshots in /reports/images/)
- Strengths:
 - Enterprise sales capability and outcome measurement (cite enterprise case studies)
 - Extensive course catalog and partner-backed certifications
- Weaknesses / customer complaints:
 - Reported common complaints (to be quantified): pricing, support response time, content update frequency (support with Trustpilot/G2 sample quotes)
- Data sources & artifacts:

- Pricing screenshots:
/project_root/reports/images/pricing_simplilearn_<timestamp>.png
 - Catalog CSV:
/project_root/raw_data/simplilearn_courses_<date>.csv
-

5. Edureka profile (to be validated with Task 1 scrapes)

- Overview:
 - Founded: <<year>> (source: company about page)
 - HQ: <<city, country>>
 - Employee count (LinkedIn): <<count>>
- Product portfolio & catalog:
 - Total courses: <<count>>
 - Key categories: Cloud, Big Data, Full Stack, Data Science, DevOps — distribution to be filled
 - Modalities: heavy emphasis on live instructor-led/cohort delivery
- Pricing & packaging:
 - Typical per-course price range (USD): min A — *median* B — max C
 - Cohort offers and EMI available for many high-ticket programs
- Strengths:
 - Cohort-first, live instruction and mentor support; strong appeal for career-switchers and SMEs
- Weaknesses / customer complaints:
 - Reported common complaints (to be quantified): platform reliability; older content in some courses;

variability in instructor quality (support with review quotes)

- Data sources & artifacts:
 - Pricing screenshots:
/project_root/reports/images/pricing_edureka_<time stamp>.png
 - Catalog CSV:
/project_root/raw_data/edureka_courses_<date>.csv
-

6. Comparative analysis (side-by-side)

- Key metrics (placeholder table — to be filled by Analyst from Task 1)
 - Metric | Simplilearn | Edureka | Source(s) / notes
 - Total courses | <<>> | <<>> | /raw_data/
 - Live courses (%) | <<>> | <<>> | course detail pages
 - Median price (USD) | <<>> | <<>> | pricing pages
 - Monthly visits | <<>> | <<>> | SimilarWeb
 - App rating (Google Play) | <<>> | <<>> | Google Play exports
 - Funding total | <<>> | <<>> | Crunchbase
- Price distribution chart:
/project_root/reports/images/price_distribution.png
(boxplot; alt-text: price distribution across courses by site)
- Feature comparison (binary + notes):
 - Certification (Y/N), University partnerships, Enterprise LMS, 3rd-party integrations (SSO/LMS), Placement support, Refund policies — fill with validated values.

Interpretation (provisional):

- Simplilearn is positioned toward enterprise scale, higher median price per certification, and broader catalog.

Edureka is positioned for live-cohort experience, often with competitive pricing for cohorts and individual learners.

- Recommendation: choose channel experiments per brand (enterprise ABM + LinkedIn/premium display for Simplilearn; social + YouTube + paid search + cohort marketing for Edureka).
-

7. Pricing models & examples

- Observed pricing models (to capture exactly from pages):
 - One-time course price (self-paced)
 - Cohort/cohort premium pricing (live instructor)
 - EMI / installment plans
 - Subscription bundles (if present)
 - Enterprise seat-based contracts
 - Sample comparable course pricing (example rows — replace after scrapes):
 - Course: Data Science Bootcamp | Simplilearn: 1,299 | *Edureka* :999 | Notes: cohort vs self-paced; URL
 - Course: AWS Architect Certification Prep | Simplilearn: 699 | *Edureka* :599 | Notes: Includes labs vs no labs
 - Interpretation: Cohort/live programs command premium for instructor access and placement support; subscription bundles improve LTV but require gating and content packaging.
-

8. Industry trends & developments (evidence-based topics to cite)

- Growth of micro-credentials and employer-recognized certificates.
 - Hybrid learning models: self-paced + live sessions increasing completion and outcomes.
 - Enterprise L&D moving to subscription and seat-based contracting.
 - Increased competition from MOOC providers and specialized bootcamps.
 - Evidence list (to populate): HolonIQ, MarketsandMarkets, Statista, press releases from major vendors, announcements about partnerships.
-

9. Key insights & recommended next steps (actionable)

Top insights (synthesized):

- Insight 1: Enterprise opportunity favors providers with seat-based admin, outcome measurement, and integration capabilities — Simplilearn appears better aligned (validate with enterprise client list).
- Insight 2: High-touch, cohort-based learning remains attractive for career switchers — Edureka's live model aligns to this cohort demand.
- Insight 3: Pricing experiments and subscription packaging are high-impact levers for LTV/CAC optimization.

Recommendations (priority, owner, timing):

1. Enterprise pilot with Simplilearn (50 seats; 3 months) — Owner: BD Lead — 30–90 days.
2. Pricing experiments per brand (A/B cohort price points; subscription trial) — Owner: Pricing Lead — 60 days.
3. Growth pilots: Paid search (high-intent) + ABM for enterprise accounts — Owner: Growth Lead — launch Day 1–30.
4. Run customer sentiment analysis and instructor quality audit to surface content refresh needs — Owner: Product Ops — 30–45 days.
5. Consolidate raw datasets and complete QA checks before final board presentation — Owner: Data Engineer + Analyst — immediate.

Deliverables after adoption:

- Finalized TAM/SAM/SOM workbook, populated competitive matrix, TAM sensitivity table, final_report_v1.pdf, executive_deck.pptx.

10. GTM strategy (full playbook)

Note: This GTM was developed with practical assumptions. Replace estimated numeric inputs with Task 1/2 data for final plan.

Overview: Deliver prioritized, measurable GTM playbooks for Simplilearn and Edureka covering ICPs, messaging, channels, pricing experiments, KPIs, and 30-60-90 roadmap.

A. ICPs (3 personas per company)

SIMPLILEARN ICPs

1. Career Switcher (Individual Learner)

- Age: 24–35; urban metros; mid-career.
- Needs: job-ready skills, recognized certificates, placement support.
- Channels: Google search, LinkedIn, YouTube.
- ARPU estimate: ~~300~~—1,200 (replace with Task 1 revenue).

2. Corporate L&D Manager (Enterprise)

- Firm size: 500–10,000 employees.
- Needs: measurable outcomes, easy admin, integrations.
- ARPU/contract: ~~50K~~—500K first-year pilot.

3. Continuous Learner (Subscription seeker)

- Needs: continuous microlearning, flexible schedules.
- ARPU estimate: ~~100~~—400/year (subscription-based).

EDUREKA ICPs

1. Career Switcher — Cohort-first

- Needs: live instruction, projects, placement support.
- Channels: Facebook/IG, YouTube, Google search.
- ARPU estimate: ~~200~~—1,000 per cohort.

2. SME Technical Lead (Team upskilling)

- Needs: short cohort for teams, project alignment.
- Contract: ~~5K~~—40K.

3. University / Academic Partnerships

- Needs: curriculum modularity, accreditation, revenue share.

B. Value proposition & positioning (per brand)

- Simplilearn core: enterprise-ready upskilling with industry-aligned certifications and measurable outcomes.

- Edureka core: high-touch, instructor-led cohort programs and project-based learning for faster job transitions.

C. Messaging framework (examples)

- Simplilearn headline for Career Switcher: "Fast-track Your Career in 6 Months"
- Edureka headline for Career Switcher: "Learn Live. Land the Job Faster"
- Produce 2–3 ad creatives and email subject lines per ICP (examples included in Appendix/briefing deck).

D. Channel strategy & playbooks (priority & allocation)

Priority order: Paid Search > Content & SEO > Social Ads > Enterprise Sales/ABM > Partnerships & Affiliates > Organic Community & Instructor Networks > Marketplaces.

Example budget allocation (90 days, per brand):

- Paid Search 30%, Content & SEO 20%, Social Ads 20%, Partnerships 10%, Enterprise/Events 10%, Marketplaces 5%, Contingency 5%.

Paid Search playbook (sample):

- Objective: capture high-intent course queries.
- Geo focus: India, US, UK, UAE (adjust per course).
- Landing pages: course-specific with social proof, syllabus, CTA.
- KPIs: impressions → clicks → leads → enrollments; CPA target 50–200 (individual).

LinkedIn (enterprise) playbook:

- ABM list of 50 accounts, SDR outreach, executive webinar, pilot proposal.
- KPI: demo-to-pilot conversion, ACV.

Social Ads (individual):

- Creative: instructor snippets, student outcomes, cohort urgency.
- Platforms: Facebook/IG, YouTube for acquisition; LinkedIn for enterprise.

E. Pricing & packaging experiments Recommended experiments:

1. Cohort Premium test: ~~999~~ vs 1499 for same cohort creative.
2. Subscription bundle: ~~29~~ vs 49/month with 14-day trial.
3. Enterprise pilot seat pricing: pilot discounts vs full price with renewal SLA.

Measure: enrol-to-completion, CAC, LTV, payback period.

F. Sales & enablement

- SDR playbook: 3 qualifying q's, objection handling scripts, demo checklist.
- Enterprise motion: pilot → SLA outcome → scale.
- CSM onboarding templates for pilot customers.

G. Retention & expansion

- Onboarding: Day 0 welcome, Week 1 orientation, mentor check-ins.
- Alumni community & upsell triggers (project completion, high scores).
- NPS & outcome surveys (30 days, 6 months).

H. Measurement & dashboards

- KPIs: sessions, leads, lead→enroll %, CAC by channel, ARPU, completion rate, LTV, enterprise ACV.
- Weekly dashboard (GA4 + Ads + CRM + LMS).

I. 30–60–90 roadmap (summary)

- Day 1–30: alignment call, tracking/campaign setup, publish 3 landing pages, pilot paid search.

- Day 31–60: scale paid search, launch social ad tests, host enterprise webinar, run pricing A/B tests.
- Day 61–90: scale winning channels, onboard enterprise pilot, retention programs, leadership review.

J. Resource plan & estimated costs

- Core small-team headcount and contractor assumptions provided (update with local salary bands).
- 90-day marketing budget example: \$150k per brand.

K. Experiment cadence & governance

- Weekly creative experiments, bi-weekly UX tests, monthly pricing experiments; defined action rules for scale/pause.

11. Implementation roadmap & owners (detailed)

Immediate (0–7 days)

- Ops: grant data access OR team upload artifacts. (Exact Ops string below.)
- Researcher A/B/C/E: start scrapes and exports. (Exact delegation strings below.)
- Data Engineer: set up CSV schema, fx table, and extraction_log.

Day 1–30 (owners)

- Growth Lead: launch pilot paid search campaign; report day 7.
- Analyst: build TAM/SAM/SOM workbook; annotate assumptions.

- Designer: export pricing screenshots to /project_root/reports/images/.

Day 31–60

- Product/Pricing: run pricing experiments (cohort vs subscription).
- SDR & AE: run ABM outreach to 10–50 pilot enterprise accounts.

Day 61–90

- Scale winning channels, onboard enterprise pilot, run retention programs, present 90-day results.

Owners summary (example)

- BD Lead (Enterprise pilot): owned by BD Lead
 - Growth Lead (paid search + channels): Growth Lead
 - Analyst (data, TAM): Analyst
 - Data Engineer (schema, QA): Data Engineer
 - Designer (images & charts): Designer
 - Head Manager: coordinate, standups, stakeholder briefings
-

12. Measurement & KPI dashboard (example)

Key metrics to populate and monitor:

- Acquisition: Sessions, organic vs paid, paid conversion, leads.
- Activation: lead → enroll, trial → paid conversion.
- Engagement: completion rate, active days per learner.
- Monetization: ARPU, ACV (enterprise), revenue by channel.

- Retention: 30/90-day retention, Net Revenue Retention (enterprise).
- Operational: demo velocity, time-to-onboard enterprise.

Weekly dashboard (deliverable): single-page PDF with top-line enrollments, CAC by channel, lead volume & conversion, active course completion %.

13. QA checklist (must pass before submission)

- ☐ Every data point has source_url and capture_timestamp.
 - ☐ Pricing screenshots saved and linked in /project_root/reports/images/.
 - ☐ Currency conversions logged with fx_source and timestamps.
 - ☐ Course counts reconciled and deduplicated; duplicates flagged.
 - ☐ All figures & tables include captions and source lines.
 - ☐ All hyperlinks resolve; inaccessible sources saved as PDF in appendix.
 - ☐ Spelling & grammar pass (manual + style pass).
 - ☐ Terminology consistent: use "learners" uniformly.
 - ☐ Peer reviews: one content reviewer, one format reviewer; include reviewer comments and resolutions.
-

14. Visual assets & export instructions

- All charts exported at 300 DPI PNG for PDF; source files (e.g., .pptx or .svg) stored in

/project_root/reports/images/.

- Chart styling guide (designer):
 - Color palette: Primary #1F77B4 (blue), Accent #FF7F0E (orange), Neutral greys for gridlines.
 - Fonts: Sans-serif system default for PDF (e.g., Inter or Arial); chart axis labels 10–12pt.
 - Axis labels: use sentence case, units in parentheses.
 - Tables: header bold, source line below table in italics.
 - All visuals must include caption and "Source: <URL> (accessed YYYY-MM-DD)".

Export steps:

1. Finalize master markdown: final_report_v1.md
2. Render to PDF with embedded images and clickable TOC: final_report_v1.pdf
3. Create slide deck (10–15 slides): executive_deck.pptx and export pdf.
4. One-page summary: one_page_summary.pdf

15. Appendices

Appendix A — Data appendix (location and example files)

- Location: /project_root/raw_data/
- Example files expected:
 - simplilearn_courses_YYYYMMDD.csv
 - edureka_courses_YYYYMMDD.csv
 - simplilearn_pricing_YYYYMMDD.csv
 - edureka_pricing_YYYYMMDD.csv
 - extraction_log.csv
 - SimilarWeb_export_simplilearn_YYYYMMDD.csv

- SimilarWeb_export_edureka_YYYYMMDD.csv

Appendix B — Scraping plan & selectors (excerpt)

- Respect robots.txt; rate-limit 1 req/sec per domain.
- Save raw HTML:
/project_root/scrapes/<site>/<path_slug>-<YYYYMMDDTHHMMSS>.html
- Extraction log columns: source, page_url, timestamp, method, raw_html_path, status, notes.
- Example target fields: course_id, course_title, category, modality, duration, price_amount, currency, url, capture_timestamp.

Appendix C — Calculations & assumptions (examples)

- Revenue estimate formula:
 - $\text{annual_revenue} = \text{monthly_visits} * \text{conversion_rate} * \text{avg_order_value} * 12$
- Assumptions for sensitivity analysis:
 - site conversion range 0.1% — 1.0%
 - avg_order_value range 50—500
- Provide best/worst/median scenarios in TAM_SAM_SOM workbook.

Appendix D — Sources & citations (to be populated)

- Numbered list of all URLs with full citation and access date. Example entry once populated:
 - [1] Simplilearn pricing page, accessed 2026-09-04, <https://www.simplilearn.com/pricing>

- [2] Edureka pricing page, accessed 2026-09-04, <https://www.edureka.co/pricing>
- [3] HolonIQ, "Global Online Professional Certification Market 2024", accessed YYYY-MM-DD, URL

Appendix E — Reproducibility README (short excerpt)

- Steps to reproduce:
 1. Run scrapers: `python scrape_site.py --site simplilearn --out /project_root/scrapes/simplilearn/`
 2. Transform: `python transform_courses.py --input /project_root/scrapes/ --out /project_root/raw_data/`
 3. Normalize currency: `python normalize_fx.py --input normalized_courses.csv --fx_source oanda --out /project_root/analysis/`
 4. Generate charts: `python make_charts.py --input /project_root/analysis/normalized_courses_usd.csv --out /project_root/reports/images/`
 - Exact search queries and selectors included in `/project_root/docs/reproducibility_README.md`
-

16. Peer review & QA actions required

- Assign one content reviewer and one format reviewer. Reviewer commands (send exact strings to reviewers below).
- Collect reviewer comments in the master markdown (track as GitHub PR or review document). Include reviewer sign-off before PDF export.

Reviewer delegation strings (send as plain text lines):

"Reviewer: Complete content review and annotate

comments in the document" "Reviewer: Complete format review and confirm all visuals match style guide"

17. Deliverables and handover package (final)

To be delivered to stakeholders after QA:

- final_report_v1.md (editable) — /project_root/reports/
- final_report_v1.pdf — /project_root/reports/
- executive_deck.pptx and executive_deck.pdf — /project_root/reports/
- one_page_summary.pdf — /project_root/reports/
- data_appendix.zip (raw_data and scrapes) — /project_root/raw_data/
- reproducibility_README.md — /project_root/docs/
- briefing_script.txt — /project_root/docs/

Schedule executive briefing:

- Duration: 30–45 minutes
 - Objective: present top findings, recommendations, and next steps; Q&A
 - Owner: Head Manager to schedule once assets are finalized
-

18. Exact delegation strings (send each exact

line to the named person; plain text)

Research & scraping: "Researcher A: Extract pricing tables from simplilearn.com and edureka.co; save raw HTML and CSV to /scrapes/ by EOD" "Researcher B: Pull course catalogs (list of courses and categories) for both sites and store in /raw_data/ by EOD" "Researcher C: Collect press releases, funding announcements, and about pages for Simplilearn and Edureka; save raw HTML and summarize in /analysis/ by EOD" "Researcher D: Pull SimilarWeb/Semrush traffic estimates, top countries, and app store metrics for both companies; store in /analysis/ by EOD" "Researcher E: Scrape Trustpilot, G2, and top review pages for Simplilearn and Edureka; extract top positive/negative themes and sample quotes; save to /analysis/ by EOD"

Data & analysis: "Data Engineer: Set up CSV schema and merge rules; validate scraped fields by tomorrow noon" "Data Engineer: Normalize currencies to USD using FX rates from OANDA on the capture date; store fx_rate table in /analysis/ by tomorrow noon" "Analyst: Gather market size reports and compile source list and excerpts in /analysis/ by tomorrow" "Analyst: Compute course portfolio breadth (total courses, by category, by modality) and produce CSV and charts in /analysis/ by day 3" "Analyst 1: Build TAM/SAM/SOM workbook using sources in /analysis/; annotate assumptions" "Analyst 2: Draft competitive positioning matrix and populate with 6 competitors; include 1-sentence rationale each" "Analyst 3: Draft SWOTs and trend implications for Simplilearn and Edureka"

Design & visuals: "Designer: Export all charts at high resolution and copy to /reports/images/" "Designer: Take pricing screenshots and save in /reports/images/ with filenames pricing_simplilearn_<timestamp>.png and pricing_edureka_<timestamp>.png by EOD"

GTM & operations: "GTM Lead: Draft ICPs and messaging one-pagers for Simplilearn and Edureka; deliver 3 persona pages each" "Paid Media: Launch pilot search campaign and deliver performance report after 7 days" "SDR Lead: Build 10-account ABM list and prepare outreach sequences"

Coordination & meetings: "Head Manager: Schedule daily 15-minute standups at 09:30 local for the week of collection" "Reviewer: Verify TAM/SAM/SOM calculations and assumptions, initial and date in the document" "Reviewer: Complete content review and annotate comments in the document" "Reviewer: Complete format review and confirm all visuals match style guide"

Ops escalation (send this exact string to Ops if access needed): "Ops: Please grant MCP web search API / MCP search access, ScrapeWebsiteTool (HTML fetch with robots compliance), shared drive path (project_root), dataset repo, and Google Sheets/Looker/PowerBI access. If access cannot be granted, inform Head Manager and confirm fallback to manual extraction."

Alternate team upload instruction (send this exact string to the team if you will not grant web access and will upload artifacts): "Team: Uploaded Task 1 artifacts (simplilearn and edureka raw HTML, cleaned CSVs, extraction_log.csv, SimilarWeb/Semrush exports, review exports, industry report PDFs) to /project_root/raw_data/; notify Head Manager when complete."

Additional immediate delegations (repeat if needed): "Analyst: Compute course portfolio breadth (total courses, by category, by modality) and produce CSV and charts in /analysis/ by day 3" "Designer: Export all charts at high resolution and copy to /reports/images/"

19. Final QA checklist before submission (summary)

- Confirm executive summary aligns with validated numbers.
 - Ensure every claim has a numbered citation and corresponding appendix entry.
 - Run spelling/grammar pass and consistent terminology check (use "learners").
 - Confirm all files exist at referenced paths.
 - Peer reviewer sign-off obtained (content + format).
-

20. Next-step confirmation (pick one)

Please confirm one of the following so the team can proceed:

Option A — Grant Ops access now (recommended): Send this exact string to Ops: "Ops: Please grant MCP web search API / MCP search access, ScrapeWebsiteTool (HTML fetch with robots compliance), shared drive path (project_root), dataset repo, and Google Sheets/Looker/PowerBI access. If access cannot be granted, inform Head Manager and confirm fallback to manual extraction."

Option B — Upload Task 1 artifacts yourself: Send this exact string to the team (or upload files to the shared path): "Team: Uploaded Task 1 artifacts (simplilearn and edureka raw HTML, cleaned CSVs, extraction_log.csv, SimilarWeb/Semrush exports, review exports, industry report

PDFs) to /project_root/raw_data/; notify Head Manager when complete."

Option C — Assign delegations now and confirm responsible owners: Use the exact delegation strings above to assign tasks to team members and return here with confirmation of who is assigned to each string.

End notes

- I cannot fetch live web data from this environment. The report above is a fully-detailed, executable final report and GTM playbook with clear placeholders, methods, exact delegation strings, file paths, and QA steps. Once Ops grants access or Task 1 artifacts are uploaded, the Research and Data teams can populate raw CSVs. After that I (Head Manager / Analyst) will finalize numeric inputs, run the QA checklist, export final_report_v1.pdf, produce executive_deck.pptx, and schedule the executive briefing.

If you want me to proceed now, confirm Option A, B, or C and indicate who will be assigned to each delegation string.
